1 October 2020

Tool Selection

This project will be implemented using the following tools.

- **Design:**
  - UI will be created using React

- **Development:**
  - Code will be written in Javascript
  - Payments will be made through Paypal
  - Database will be stored in MySQL
  - User authentication will be supported by Auth0
  - Testing will be done through Test IO

- **Deployment:**
  - Hosting of the website will be done through Firebase

- **Documentation:**
  - Documentation of the project will be done on Google Docs and put on my project GitHub repository

- **Scheduling:**
  - A tentative schedule is kept on a Google document to view the general timeline of the development of the website.
  - The dates of each task are noted in my personal agenda to keep track of what is due.
